We Do Not :

- Put customers under any pressure to buy
- Follow up with phone calls to put you under pressure -
- Pay any of our team commission

Plantation Shutters

Plantation Shutters give natural warmth and beauty to their surroundings.

Shutters are one of our most popular products and make a beautiful addition to any room.

We offer them in a range of styles to suit your windows and they have the extra advantage of being fantastic heat insulators.

Shutters can be quite customisable as you can choose your tilt option, slat size and hinge colour.

Most of our shutter ranges are made in China and have a lead time of 8-12 weeks.

While you wait we offer free temporary blinds for all our shutter orders.

Looking for a faster lead time? Our UK made shutter has a lead time of 5 weeks

Types of Shutters

Vazon

Our entry range, Vazon, is made from MDF. This is a very hard material which makes them great for windows of smaller width.

Vazon is available in 9 painted colours.

Alderney

This range is also made of MDF however it features light ABS slats. This means this range is better suited for larger windows as they have less weight bearing on the hinges over time.

Alderney is available in 24 painted colours

Fermain

Made from a finger-jointed Hardwood, our Fermain range is a great option for a more cost effective wood shutter.

Fermain is available in 24 painted colours.

Types of Shutters

Wisley

The Wisley is a durable engineered polyvinyl shutter which gives a long lasting finish that stands up to moisture, heat and ultraviolet rays

This range is made in the UK and therefore have a lead time of 5 weeks!

Sark

The Sark range is made from a lightweight hardwood, which makes them perfect for windows with large widths and Tier on Tier.

Sark is available in 24 painted colours and 22 stains.

Wooden Venetian Blinds

Wooden Venetians Blinds bring the natural beauty of wood into your home.

Faux Wood Venetian Blinds

This is a perfect option for a bathroom as it's moisture resistant.

Roller Blinds

With a huge selection of fabrics including room darkening, moisture resistant and voile fabrics.
We even offer fun children's fabrics!

Day & Night Blinds

These blinds have alternating strips of fabric that can be adjusted for light and privacy.

Motorised Blinds

Roller Blinds

Roller blinds may also be motorised and are our most popular and cost effective motorised option.

This is a popular option for covering bi-fold doors, as they are less intrusive when not in use.

Venetians

Motorised Venetians have the ability for the tilt and lift to be controlled via a remote.

Heading on holiday? With a hub you can set timers to tilt the slats, giving the impression someone is at home.

We use Lithium-ion batteries in many of our motorised blinds which can last up to 9 months and are easily re-charged.

Our range of Motorised Blinds can be connected to a Hub and controlled from your phone, or even via a virtual assistant such as Alexa.

Motorised Blinds

Pleated Blinds

Motorised pleated blinds can be a great idea, for example, having pleated blinds with UV protection in a conservatory where there are usually multiple windows; removing the need to raise and lower each blind individually.

Roman Blinds

Using motorisation makes it easier to have blinds like roman blinds around children as they are child safe by design, using no chain.

Day & Night Blinds

The advantage of having these motorised is you can now spend less time opening the blinds (which have double the length to travel).

Pleated Blinds

Most pleated fabrics have a solar reflective coating on the back, making pleated blinds the perfect choice for a south facing window or conservatory roof.

It reflects more of the heat out in the summer and helps to keep in the warm air during the colder months.

Micro Intu Pleated Blinds

Designed specifically for bi-folding doors, these blinds sit close to the glass with minimal protrusion.

The honeycomb fabrics are an ideal option as they improve room darkening and insulation.

Perfect Fit Blinds

We offer Perfect Fit aluminium and pleated blinds. These blinds include a full frame which holds the blind and protects the cords – a perfect option for children or pets who may get caught in the cords.

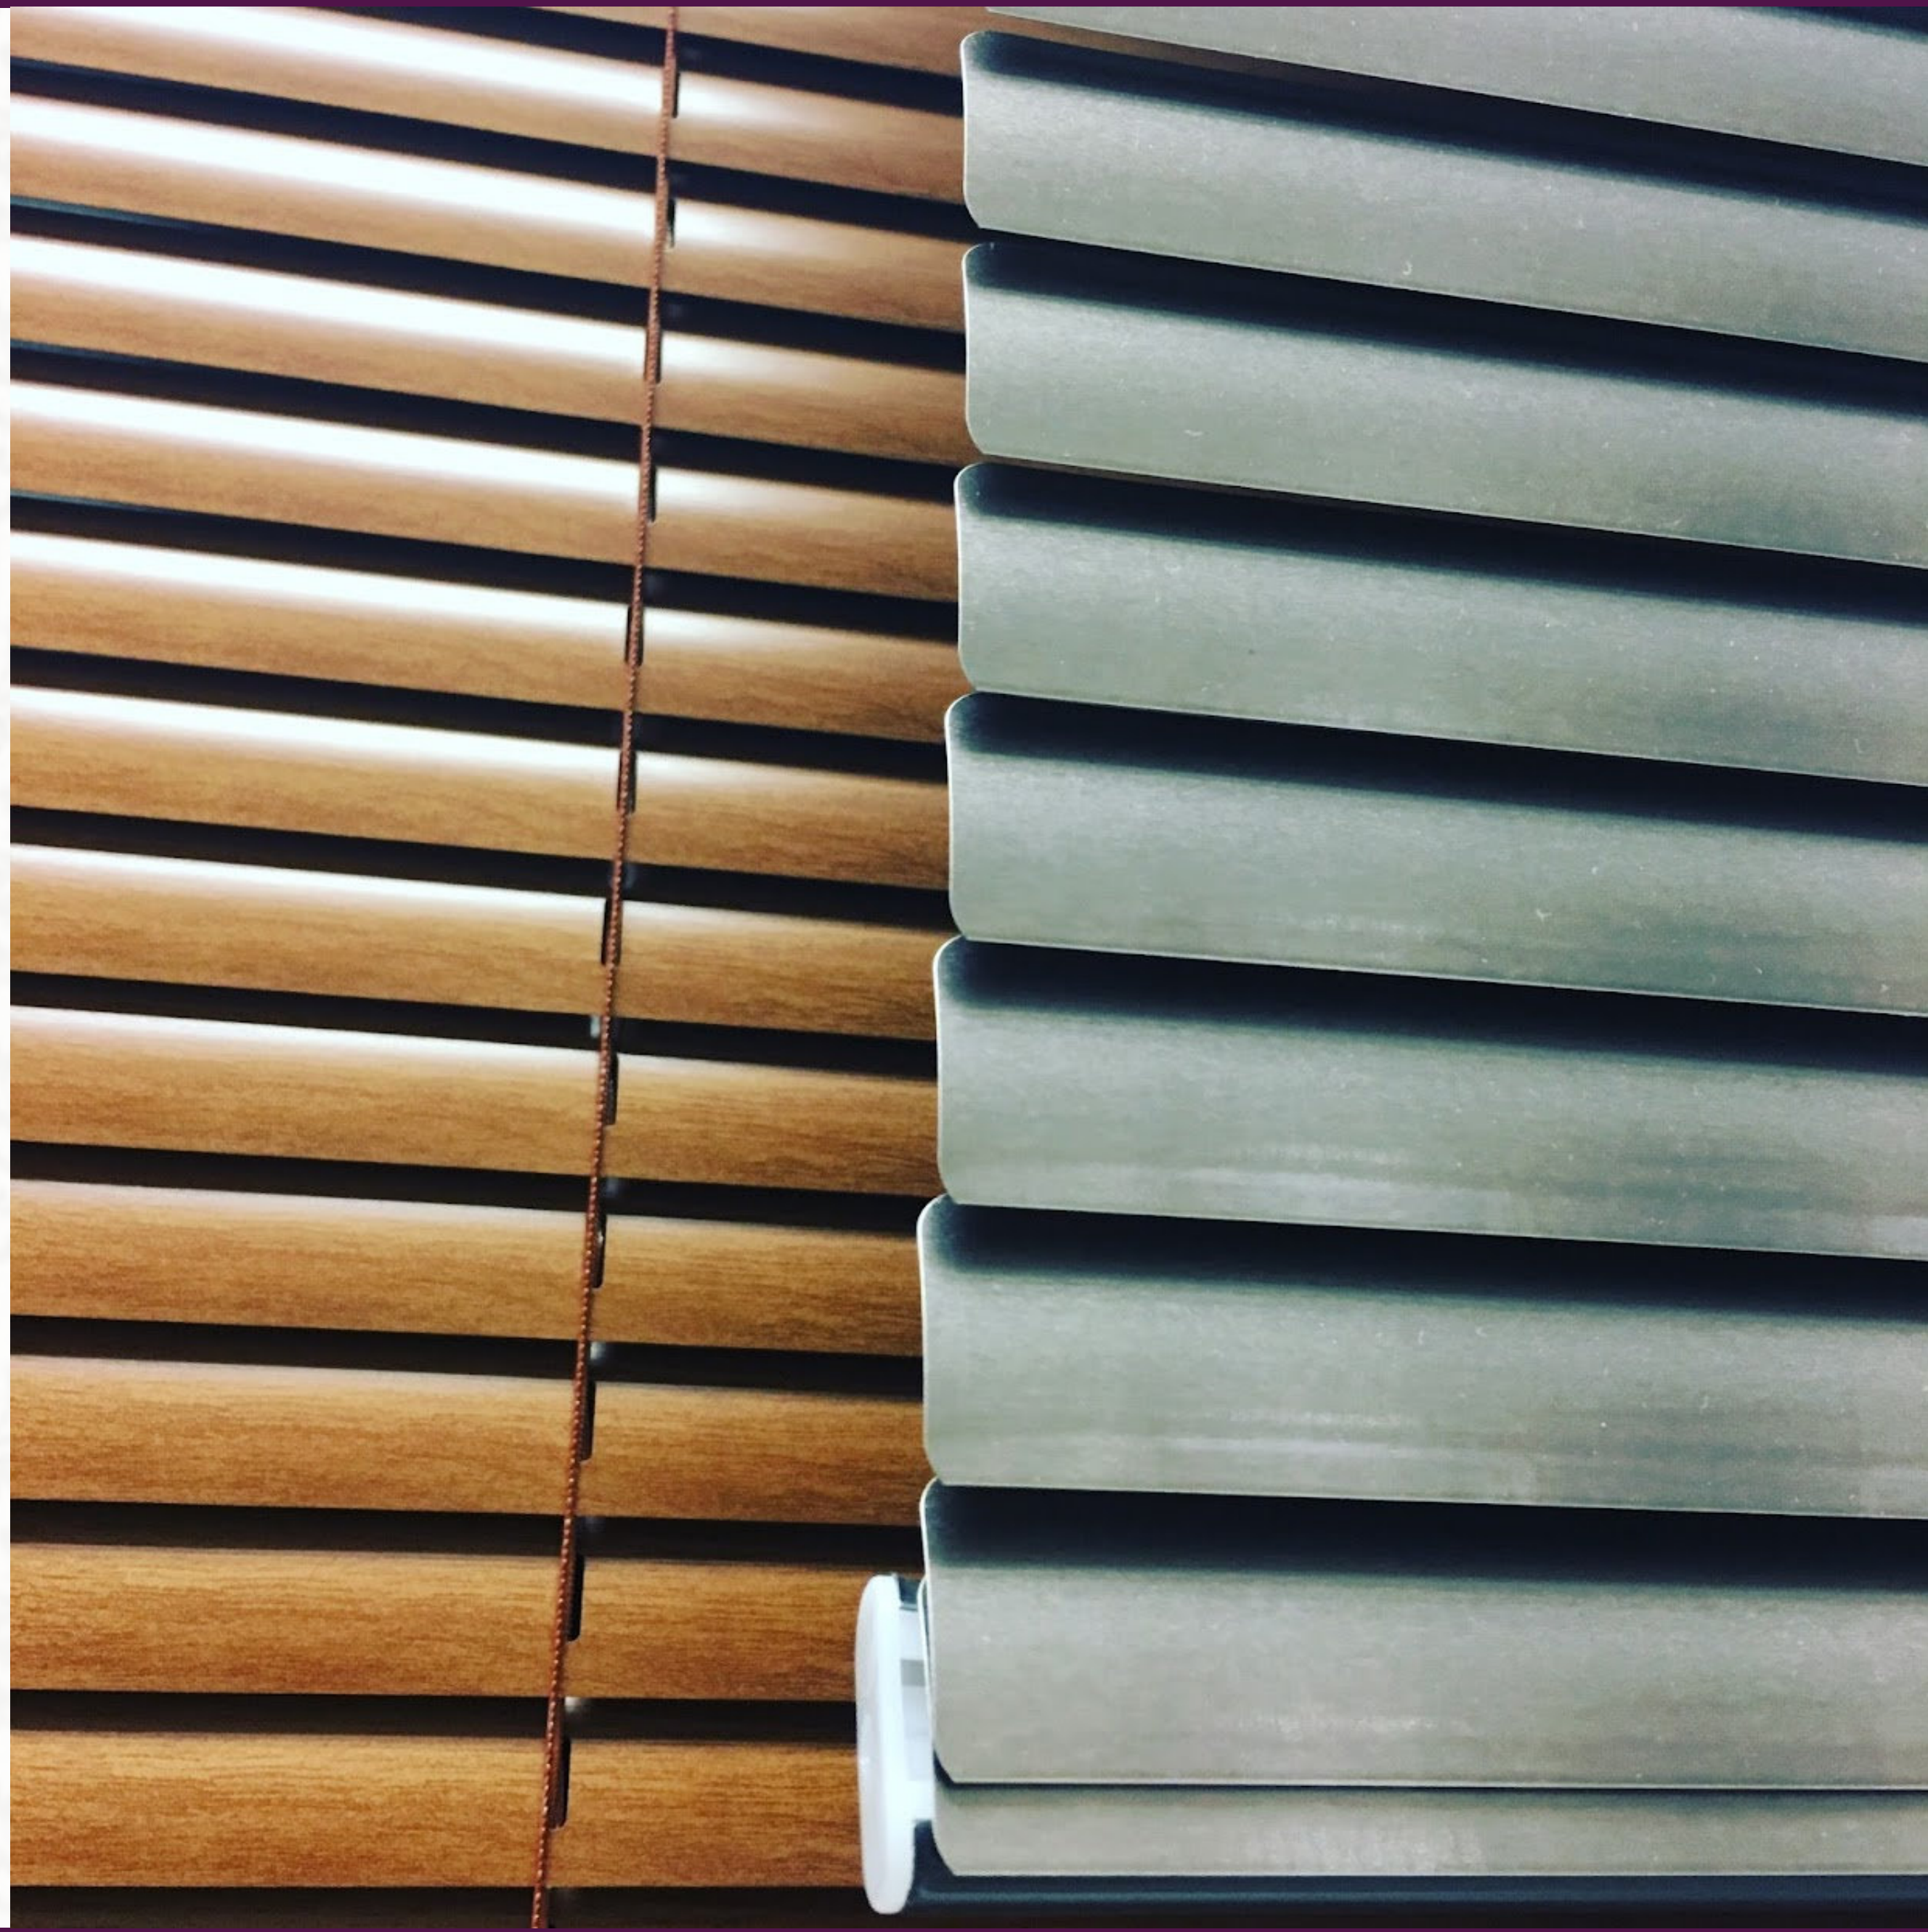

Intu Blinds

Intu Blinds involve no drilling or screws and therefore cause no damage to your window. The brackets slip behind the rubbers on the windows allowing the blind to be clipped on, this allows them to move with the window when it is opened and closed.

Aluminium Venetian Blinds

Aluminium venetian blinds come in a huge range of colours - from bright, vibrant slats to those with a special finish such as a brushed slat.

Vertical Blinds

Vertical blinds are a fantastic option for doors as they allow easy access to your doors whilst being one of our more cost effective options.

They come standard with a wand operated track and with chainless bottom weights, giving a cleaner look.

Roman Blinds

Roman blinds and curtains are a luxurious option. They are often talked about together as they are available in the same fabrics allowing you to coordinate them.

Curtains

Every roman blind and curtain is hand finished with a poly cotton lining as standard. You can also upgrade to a blackout or interlining making them a good thermal option.

We have a huge range of fabrics for you to choose from including some designer fabrics.
